## HOUSING MARKET CONDITIONS

**1ST QUARTER**

**2026**

# Q1-2026 CAAR

## REGIONAL MARKET SUMMARY

**Market Activity:** The CAAR regional housing market had a dip in sales overall to start 2026, though some local markets had an influx of sales activity. There were 683 total sales regionwide in the first quarter of 2026 (Jan-Mar), 12 fewer than the same period last year, a 2% decrease. Statewide sales numbers were up 6% compared to the first quarter last year. Within the CAAR footprint, the sharpest drop in closed sales this quarter occurred in Nelson County (-31%). Albemarle County (-11%), and Fluvanna County (-11%) also had a slowdown in activity. Meanwhile, the Greene County (+37%), and Charlottesville (+33%) markets had a big jump in sales from a year ago. Both of these localities also had a big surge in pending sales (new contracts) during the quarter, indicating stronger buyer activity in those markets compared to last year.

**Price Trends:** Home prices continue to cool in parts of the region as more supply hits the market. The regionwide median sales price in the CAAR area was \$450,000 in the first quarter, the same as the first quarter last year (0%). Price changes varied widely by locality. The median sold price in Greene County (-7%), and Fluvanna County (-6%) were down from last year, and the median price rose modestly in Albemarle County (+2%), and Charlottesville (+1%).

**Inventory Conditions:** The inventory of active listings in the region expanded significantly in the first quarter. There were 1,071 active listings at the end of the first quarter in the CAAR footprint, an influx of 196 listings compared to last year (+22%). Active listings in all local markets in the region increased sharply this quarter. The regionwide months of supply in the first quarter was 3.4 months, which is up from 2.9 months a year ago.

**Outlook:** Market conditions in the region are pointing towards choppy spring market in 2026. Within the first quarter, February was the only month that sales activity outpaced last year, and this correlated with mortgage rates falling. This suggests that the pace of the spring market will be largely dependent on the direction of rates. Buyers in the market will have more options to choose from this spring, and home price growth has slowed in some areas, so if rates dip, it could facilitate more sales in the coming months.
